"A passionate QA Engineer dedicated to building high-quality, scalable applications."

Summary

Senior QA Engineer with 6 years of experience in manual and automated software testing across web, mobile, API, and Web3 products. I build evidence-based QA processes, prove that tests catch real regressions, and use AI coding agents to scale test design and execution. Contributed to gains of 231.69 ETH (about 650K USD) in blockchain projects.

Skills

E2E Test	Manual and Automation, Web · iOS · Android
Automation	Playwright, Cypress, Selenium IDE, Jest
Mobile Test	Appium, adb + uiautomator, iOS Simulator, Android Emulator, BrowserStack, LambdaTest
API Test	Postman, MochaJS, Swagger, Scalar
Database Test	PostgreSQL, Testcontainers, data migration checks
Performance and Load Test	JMeter, K6, Locust, PageSpeed Insight
Security Test (Basic Intercept)	BurpSuite
Agent-driven QA	Claude Code, Codex, OpenCode
Management Tools	Linear, Jira, Notion, Qase.io, Trello, Asana
Blockchain Tools	Testnet ETH Blockchain, Web3.Js, Solidity

Work Experience

OCX

Indonesia

Senior QA Engineer

Oct. 2025 - Present

- Sole QA Engineer for a trading-card collectibles marketplace covering web, admin panel, and iOS/Android app: buying, offers and negotiation, escrow, vault storage, shipping, and payments.
- Designed and ran a staged QA pipeline per ticket (analysis, test design, review gate, execution, automation, bug report), applied to 369 tickets, with every verdict traceable to the tested build.
- Used mutation testing on 239 tickets, deliberately breaking each fix to prove its tests catch regressions, and exposed tests that only passed because of mocks.
- Caught release blockers that passing unit tests missed, including storage cleanup, SQL query, and payment-gateway edge cases, with root cause and fix guidance.
- Failed 32 tickets with reproduction steps, build SHA, root-cause hypothesis, and suggested fix, and triaged new bugs in Linear by priority and environment.
- Tested end to end on web, admin, iOS Simulator (Appium), and Android Emulator (adb, uiautomator), including deep links, English and Indonesian copy, and sandbox payments.
- Contributed to a 300+ spec Playwright suite (web, admin, CMS, smoke, visual), including read-only specs that run safely against shared staging data.
- Ran integration tests against real PostgreSQL with Testcontainers and verified data migrations up, down, and idempotently before sign-off.
- Ran the QA pipeline with AI coding agents (Claude Code, Codex) that hand work off through files committed to the repository.

Labtek Indie

Bandung, Indonesia (REMOTE)

Software QA Engineer (Freelance)

Aug. 2025 - Sep. 2025

- Led quality assurance for PT Kereta Api Indonesia's recruitment web application across all testing phases.
- Designed and executed test strategies covering functional, UI/UX, API, and performance testing.
- Built and maintained end-to-end test suites using Cypress and Node.js to widen coverage and reduce manual effort.
- Validated data integrity with PostgreSQL across the full recruitment flow.
- Managed the bug lifecycle from discovery to verified fix, and ran regression across alpha and beta environments before production release.

Agate International.

Bandung, Indonesia

Senior Quality Assurance

March. 2022 - June. 2025

- Collaborated with senior colleagues and development teams to define and implement standardized API testing methodologies, improving testing consistency across projects.
- Designed, documented, and maintained comprehensive test case scenarios (positive, negative, edge cases) for API, UI, and functional tests, mapped directly to business logic and acceptance criteria.
- Performed fundamental security tests such as SQL Injection and XSS simulation using Postman, DevTools, BurpSuite, and manual payload crafting to identify common vulnerabilities in API workflows.
- Executed load and stress testing for REST APIs using JMeter, Locust, and K6, analyzing throughput, latency, and system behavior under peak conditions.
- Automated API testing workflows using Postman, Playwright, MochaJS, Swagger, and Scalar to accelerate regression cycles.
- Performed responsive and cross-device testing using iOS Simulator, Android Emulator, BrowserStack, and LambdaTest.
- Documented bugs and issues using Notion, maintained tracking status, and collaborated closely with developers for resolution.
- Led final QA checks, hotfix verifications, and regression and smoke testing in staging and production environments.
- **Key Projects:**
  - **UMKM BCA Web App:** Delivered a full-scale web app for Bank BCA in under one month. Created and executed test cases for functionality, UI, API, and performance. Handled bug tracking, fix verification, and regression testing in production.
  - **BCA Gacha Bug Reproduction:** Reproduced a critical bug in reward distribution logic by simulating 10 concurrent gacha users. Identified the root cause and supported the backend fix.
  - **DEUS Web Game Project:** Worked on a browser-based game. Conducted regression testing across gameplay modules and executed performance tests simulating 10K+ concurrent users.

Confiction Labs.

Jakarta, Indonesia

Web3 Lead QA Engineer

March. 2022 - May. 2025

- Released 11 products, 3 products Web3 related, and contributed to gains 231.69 ETH equal to 650K in US Dollar.
- Created and Designed a Test Plan, Scenario Test Cases, Bugs Tracking Report, and Post Mortem.
- Performed manual and automated testing: Smoke Test, Integration Test, API Test, Security Test, Performance Test, Stress Test, Load Test, UI Test, and Web3 Transaction Test.
- Collaborated with Tech Lead, PM, and Chief Product Officer to produce robust, secure, and functional Web3 products.
- Ensured Blockchain transactions functioned correctly (Deposit, Staking, Withdrawal, AirDrop, Quest, and Auction).
- Managed the QA team and assigned product Web3 Supervisors for each product.
- Trains AI to conduct reply more naturally.

Yayasan Benih Baik Indonesia *Tangerang Selatan, Indonesia*

QA Software Associate *Feb. 2022 - March. 2023*

- Designed and executed detailed test scenarios and cases to validate functionality, performance, and user requirements across web and mobile platforms.
- Conducted smoke, regression, full-cycle, bug verification, and mobile application testing (Android & iOS), including payment flow validation.
- Performed automation testing using Cypress and Selenium IDE to increase test coverage and reduce manual effort.
- Utilized BurpSuite to reproduce security vulnerabilities and analyze request/response behaviors for intercept testing.
- Tested a carbon emission web application by validating geolocation-based features using map coordinates to ensure alignment with real-world planting areas.
- Documented and reported bugs with reproducible steps, ensuring efficient collaboration with developers and product teams.

PT. Pasific Internusa *Jakarta, Indonesia*

QA Software Tester *Aug. 2020 - March. 2021*

- Created Test Plan, Scenario Test Cases, and Report Bugs using Trello.
- Performed extensive testing for an e-commerce platform, focusing on payment systems, product listings, and user experience.
- Find 150 bugs, 50 critical bugs, and 100 UI bugs.

PT. Integralindo Asia Pasific. *Jakarta, Indonesia*

Implementer & Tester *Nov. 2018 - Feb. 2020*

- Created QC checklist document, scenario test cases, and report bugs tracking using Asana.
- Found and Fixing the error using Eclipse for JavaFX app, that impact to 565 users.
- Implemented the software to 565 customers.

Let's Flip *Singapore (REMOTE)*

Freelance Application Tester *Jan. - Feb. 2021*

- Conducted application testing for iOS and Android mobile phone.

Achievement & Awards

2022 **Best Employee Performance**, Agate International *Bandung, Indonesia*

2019 **Best Employee in 3 Months**, Integralindo Asia Pasific *Jakarta, Indonesia*

2010 **Database Destruction Discovery**, Mitra Kasih Hospital *Cimahi, Indonesia*

Educational Background

Universitas Terbuka *Indonesia*

S1 - Sistem Informasi (Online Class) *Jan. 2022 - 2026*

Universitas Komputer Indonesia *Bandung, Indonesia*

Komputerisasi Akuntansi *2006 - 2009*

Certification

UDEMY *Bandung, Indonesia*

Cypress: Web Automation Testing from Zero to Hero *2025, February*
